

Food Safety Policy

Scope: Prepak manufactures Poly-Ethylene Terephthalate (PET) Preforms, High Density Poly Ethylene (HDPE) Caps and handles, and Polycarbonate Gallons, consistent with its customers' requirements regionally and in European and African markets.

Prepak is committed to provide:

- Food-contact products that satisfy applicable food safety and customer requirements compliant with Legal and other requirements within the framework of ISO 22000:2018 and good manufacturing/hygiene practices.
- Food Safety objectives that are set and reviewed for continual improvement and suitability of the food safety management system.
- Adequate internal and external communications with related interested parties, regarding food safety.
- Food safe products by identifying and reducing the risks of cross contamination in all types of work activities.
- Guidance, instructions, trainings, and supervision to improve individual's competence and understanding of Food Safety hazards and threats.

This Policy is communicated through appropriate methods to interested parties, and is reviewed on timely basis, and as required, for continuing suitability.
